PROFILE

CS undergraduate with experience building Android apps, full-stack web applications, and AI-integrated systems. Has shipped production-ready projects end to end from an offline mesh communication app to an AI-powered service marketplace. One paper published at IEEE. Looking for full-stack or Android roles.

EDUCATION

Kalasalingam Academy of Research and Education, B.TECH - COMPUTER SCIENCE ENGINEERING
09/2022 – 04/2026
CGPA - 7.84

ST. Thomas Matriculation Higher Secondary School, Class XII
2021 – 2022
XII Percentage : 71 %

ST. Thomas Matriculation Higher Secondary School, Class X
2019 – 2020
X Percentage 74%

SKILLS

Programming skills — Kotlin, Python, JavaScript, Java
Frontend — React, Jetpack Compose, Vanilla JS, HTML5, CSS3 • **Backend** — (FastAPI, Node.js, Express, Supabase, REST APIs • **Concepts** — Data Structures, API Integration, Cryptography, Mesh Networking •
Tools & Platforms — Git, Android Studio, Razorpay, OSMDroid)

CERTIFICATES

Full-Stack Web Development (MERN) - Infoziant 📄
(98% overall, 60/60 on proctored exam)

ACHIEVEMENTS

Winner – IBM CTF Competition, Kalasalingam University
Solved real-time cybersecurity challenges in cryptography and networking.

Runner up in game development competition, 2nd Place, Game Development Competition – Euphoria 2023, Kalasalingam University
Developed an interactive game prototype recognized for creativity and design.

Winner – ACIC-KIF Hackathon 2026, Kalasalingam University
Won a 48-hour hackathon by shipping a production-grade offline mesh communication app — real encryption, real routing, real hardware. Zero internet. Zero servers.

PROJECTS

PhishGuard – AI-Powered Phishing Detection Extension

- Chrome extension (Manifest V3) + FastAPI backend three-layer scan: URL heuristics, NLP (TF-IDF + LR, 5k+ samples), and YOLOv8 brand impersonation detection.
- ~94% accuracy, <3% false positive rate, sub-500ms scan; auto-blocks pages scoring below 50 on a 0–100 trust score.
- *Python · FastAPI · YOLOv8 · TF-IDF · Manifest V3*

Servify – Electronic Service Center Aggregation Platform(IEEE Published)

- Dual-role Android app with competitive vendor bidding; Gemini 1.5 Flash AI fault diagnosis gives cost estimate and repair timeline before vendor contact.
- Real-time quote updates via Supabase Realtime, OSMDroid location pinning, photo attachments, and Razorpay in-app payment.
- Stack: Kotlin · Jetpack Compose · Clean Architecture · Supabase · Gemini API · Razorpay · Hilt · MVVM

OffGrid – Decentralized Mesh Messaging App

- Dual transport layer — Bluetooth LE for discovery, Wi-Fi Aware (NAN) for delivery with epidemic routing and SHA-256 deduplication and Hybrid RSA-2048 + AES-256/CBC encryption with local keypairs and QR fingerprint identity verification.
- Emergency SOS broadcast with boosted TTL (15 hops), full-screen overlay and haptic alerts across all mesh devices.
- Stack: Kotlin, Jetpack Compose, MVVM + StateFlow, Room DB, CameraX + MLKit.

Zeyanne Marine – Corporate Website (Freelance)

- Built a three-page corporate website for a marine spare parts company, featuring a blueprint-style canvas hero with animated ship elements and a pinned scroll feature reveal section with phone mockup.
- Implemented smooth scroll animations, a hero video background, WhatsApp float button, and fully responsive layout delivered to a live client.
- *HTML5 · CSS3 · Vanilla JS · zeyannemarine.com*

PUBLICATIONS

Servify-An Innovative Multi-Domain Service Platform, IEEE Pune Section (ICSFT 2026)

24/04/2026

Presented at ICSFT 2026 (IEEE Pune Section), themed "AI Integration for Sustainable Development", organized by MMCOE, Pune.
